evolving workspaces

australian innovation

Developed locally to fit in with global work practices, Exe Series 2 is the perfect example of a system that has evolved to meet the demands of an ever changing work environment. Simplicity and flexibility are the keys to this modular system. Exe Series 2 is designed and manufactured locally with an emphasis on ergonomics, cable management and durability.

50mm slim

versatility

exe series 2 quality

Exe Series 2 is a system that directly reflects the needs and the high expectations of our clients.

This modular system continues to meet and exceed those demands because -

- ◆ quality remains a constant—AFRDI certified product
- ◆ Exe Series 2 is manufactured with sensitivity to the environment
- ◆ Exe Series 2 is endorsed by the NSW State Government
- ◆ we know that your reputation is as important as ours

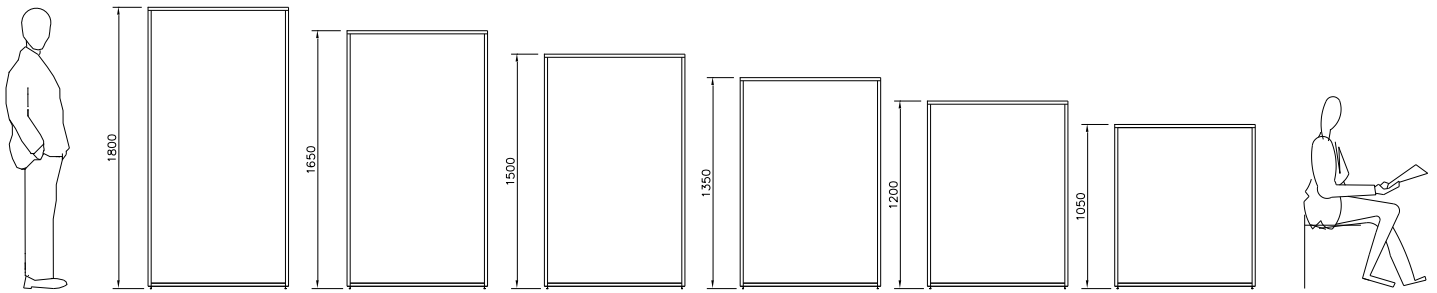

by design

Designed and manufactured locally, Exe Series 2 can be tailored to your specific project needs.

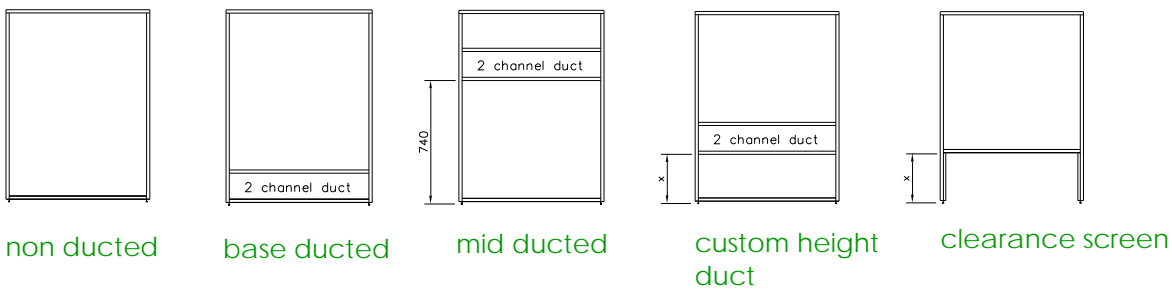

We created Exe Series 2 so that you can imagine and design for the future. We welcome the challenge of turning your workplace vision into a reality.

possibilities

endless...

sustainability

Committed to environmentally sustainable principles Exe Series 2 is engineered and manufactured to the highest environmental standards. All components can be re-used, recycled or seamlessly integrated with other products.

changing with you...

Exe Series 2 can be easily reconfigured and adapted to suit changing work environments. Because every workspace has its own requirements, Exe Series 2 can be specified in an almost limitless range of materials and finishes.

australian made

Being locally designed and manufactured ensures the best lead times and the highest level of quality control. Our design team will work closely with you to achieve the ideal workspace solution.

limitless flexibility

Creating the perfect workstation is now easy with our integrated design approach. This holistic concept allows you to mix and match components & accessories across our range of systems. You can now balance function, aesthetics and cost like never before.
