

Ventyx Brisbane

Commercial Images worked along side OPD and Hutchinson Builders to complete the fit out for the Brisbane Ventyx office.

Custom made rectangular boardroom table finished in Makore Veneer with CI Meeting Chairs.

This fit out was completed using Markant MoX Loop leg workstations. With MoX you can create an infinite variety of desk configurations, team workstations and meeting tables. This broad applicability means that the whole office can be furnished using MoX, thus creating a consistent look across the office.

To create a welcoming and comfortable lunch room environment we have used disc tables bases with matching laminate tops to match the rest of the office. Coloured bar stools have been used throughout the office to add colour to the office.
